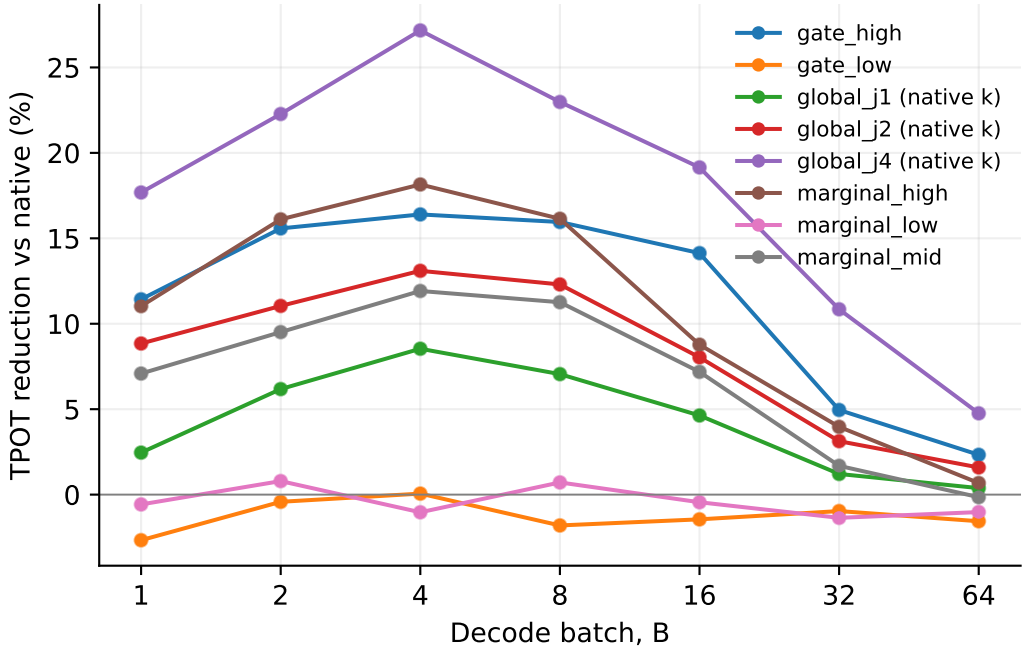
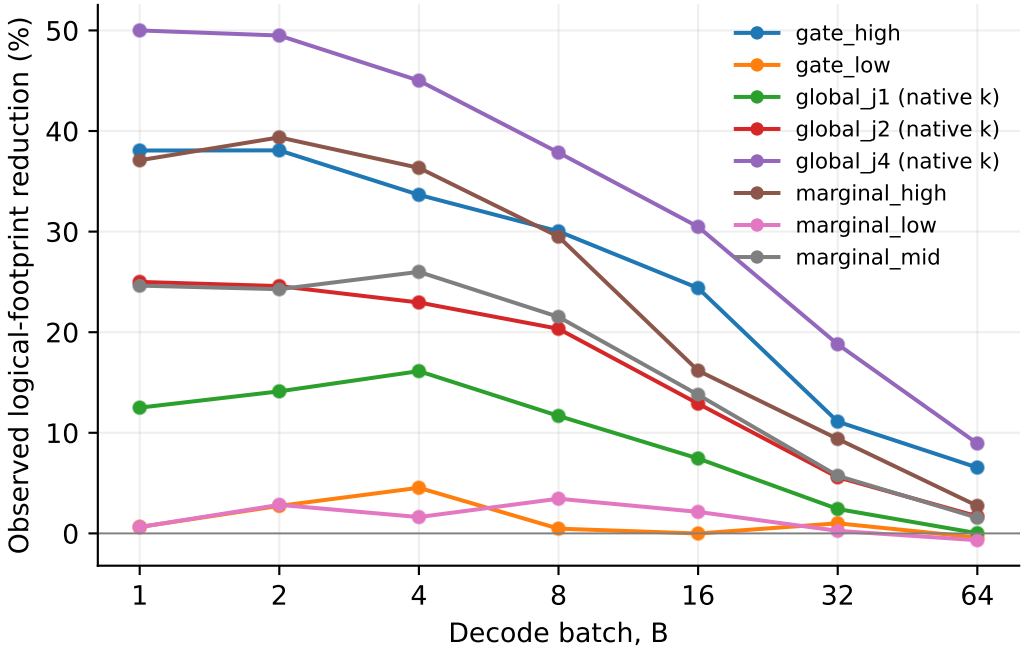
F2 OLMoE-1B-7B-Instruct | bfloat16 | quant=none | triton | graph | NVIDIA RTX PRO 6000 Blackwell Server Edition





Matched native within run / repeat / B. Faint points: observed repeats; connected points: their mean.
Footprint is counted distinct expert weight bytes, not hardware DRAM traffic; graph fixed-length generation. 1 run(s), prefix 128, output 2048; graph timing excludes route counters.
Cross-policy realized decode trajectories versus native; not the within-route before/after skip fraction.
Exploratory single run; no independent-run uncertainty estimate.
